

CLEARVIEW HIGH SCHOOL

2018-2019

COURSE SELECTION GUIDE

Clearview High School

4700 Broadway Avenue • Lorain, OH 44052 • Phone: (440) 233-6313 • Fax: (440) 233-6311

Noeleen Rothacker
Principal

Michael Newman
Assistant Principal

February 15, 2018

Dear Students and Parents:

Course selection is a very important decision for each of you. Please take this process seriously and consider your long-term goals when requesting courses for next year.

While each student receives a personal scheduling appointment with one of our guidance counselors, we strongly encourage each parent to take an active role and look through the course selection guide. This is a great opportunity for you to ask questions and get involved.

The course selection guide contains detailed information about the path you should follow in order to be prepared to obtain your vocational or post-high school goals. It also contains information about numerous programs designed to meet the unique needs of individual students.

Please do not hesitate contacting the Guidance Department at 233-6313 for additional information or assistance.

Sincerely,

Noeleen Rothacker
Principal

Michael Newman
Assistant Principal

Alicia Howard
School Counselor A-L

Carolyn Kazel
School Counselor M-Z

CLEARVIEW HIGH SCHOOL
Projected Fees for the 2018-2019 School Year

HIGH SCHOOL

Advanced Courses - English	\$10.00
Art I	\$5.00
Art II	\$10.00
Art III	\$15.00
Art IV	\$20.00
Art Independent Study	\$20.00
Ceramics	\$20.00
Historical Cinema:Art History	\$5.00
Contemporary Folk Art	\$10.00
Digital Photography I & II	\$ 5.00
Intro to Family & Consumer Science	\$10.00
Personal Financial Management	\$5.00
Child Development	\$10.00
Global Foods	\$15.00
Principle of Foods	\$20.00
Textile Design	\$20.00
Sport, Health, & Fitness Tech (Junior Year)	\$40.00
Sport, Health & Fitness Tech (Senior Year)	\$40.00
Visual Design I & II	\$10.00

All student fees and debts should be paid as soon as possible

Interim Progress Reports, Report Cards and extracurricular/athletic participation may be withheld until payment of all fees and debts is complete.

If you feel that you may qualify for fee assistance or exemption,
please contact the High School Office to obtain a Fee Waiver Application.

What It Takes to Earn a Clearview High School Diploma Graduating Classes of 2018 and Beyond

Students must meet both testing requirements and curriculum requirements in order to earn a diploma. These requirements apply to students entering their freshman year in 2018 and beyond.

I. Curriculum Requirements

<u>CURRICULUM REQUIREMENTS</u>	<u>STATE MINIMUM</u>
English/Language Arts	4 units
Health	½ unit
Mathematics	4 units *
Physical education	½ unit **
Science	3 units ***
Social studies	3 units ****
Economics and Financial Literacy	½ unit
Electives	4.5 units*****
Fine arts	1 unit *****
Minimum Total	21 units

* Mathematics units must include 1 unit of Algebra II or the equivalent of Algebra II.

** The Ohio Core allows school districts to adopt a policy that would exempt students who participate in interscholastic athletics, band or cheerleading for two full seasons from the physical education requirement. Students must take another course of at least 60 contact hours in its place.

*** Science units must include 1 unit of physical sciences, 1 unit of life sciences, and 1 unit advanced study in Chemistry, physics, or other physical science; Advanced Biology or other Life Science; Astronomy, Physical Geology, or other Earth or Space Science.

**** Social studies units must include 1 unit of American History and 1/2 unit of American government and ½ Economics and Financial Literacy. **The class of 2021 will also be required to complete 1 unit of World History**

***** Electives units must include one or any combination of Foreign Language, Fine Arts, Business, Career-Technical Education, Family and Consumer Sciences, Technology, Agricultural Education or English Language Arts, Mathematics, Science or Social Studies courses not otherwise required.

***** All students must receive instruction in economics and financial literacy during grades 9-12 and must complete at Least two semesters of Fine Arts taken any time in grades 7-12. Students following a Career-Technical pathway are exempted from the Fine Arts requirement.

Class Standings:

Students must progress through high school earning a minimum number of credits to progress to the next class standing. Students who earn at least **4 credits** will be considered **Sophomores**, **10 credits** will be considered **Juniors**, and **16 credits** will be considered **Seniors**.

State Graduation Pathways

Ohio's graduation requirements for the classes of 2018 and beyond offer several ways to earn a high school diploma in Ohio. Starting with those students who were freshmen during the 2014-2015 school year, current members of the graduating class of 2018, there are different pathways or options a student can use to be eligible to graduate. Each pathway contains two parts: credits and assessments. Each student must successfully meet the requirements of both parts.

Part 1: The credit component is the same for all students, regardless of which assessment pathway is taken. In Clearview, this requires all students to successfully complete a minimum of twenty-one (21) high school credits.

Part 2: The assessment component gives each student three ways to be eligible for a high school diploma and provides more flexibility than in previous years to reach graduation.

- **Assessment Pathway 1:** A student must earn a cumulative score of 18 points, using seven end-of-course state tests over four years of high school (these tests replace the OGT). Each test is scored on a level of 1 to 5 points. Students must earn a minimum of four points in mathematics, four points in English, and six points across the science and social studies tests. The Ohio Department of Education indicates that although a student may meet the 18 points early on with the language arts and math tests, the student is still required to take social studies and science tests for federal and state accountability requirements. Students will be given the opportunity to retest in the Winter and Spring of their Sophomore, Junior, and Senior year. Listed below are the courses where an Ohio Department of Education End-of-Course Exam is required:

English I
English II
Algebra I
Geometry
Biology
US History
American Government

- **Assessment Pathway 2:** Earn 12 points by attaining an industry-recognized credential or group of credentials in a single career field and a workforce readiness composite score of 13 on WorkKeys, a nationally recognized job skills assessment. See this website to learn about which fields apply:
<http://education.ohio.gov/Topics/Ohio-Graduation-Requirements>
- **Assessment Pathway 3:** Earn scores in English language arts and mathematics on a national college admissions test or tests that indicate the student can do college-level work. Listed below are the non-remediation scores that must all be obtained to utilize Pathway #3:

ACT Remediation-Free Scores

English- 18
Mathematics– 22
Reading – 22

SAT Remediation-Free Scores

Critical Reading -450
Writing– 430
Mathematics– 520
Reading– 450

Comparison of Diplomas with Honors Criteria

Students need to fulfill all but one criterion for any of the following Diplomas with Honors

Subject	High School Academic Diploma with Honors	Career-Technical Diploma with Honors
English	4 units	4 units
Mathematics	4 units, including Algebra I, Geometry, Algebra II or equivalent and another higher level course or a four-year sequence of courses that contain equivalent content	4 units, including Algebra I, Geometry, Algebra II or equivalent and another higher level course or a four-year sequence of courses that contain equivalent content
Science	4 units, including Physics and Chemistry	4 units, including Physics and Chemistry
Social Studies	4 units	4 units
Foreign Language	3 units, including at least 2 units in each language studied	Not counted toward requirements
Fine Arts	1 unit	Not counted toward requirements
Career-Technical	Not counted toward requirements, and may not be used to meet requirements	Now counted in Electives
Electives	Not counted toward requirements	4 units of Career-Technical minimum. Program must lead to an industry recognized credential, apprenticeship, or be part of an articulated career pathway.
Grade Point Average	3.5 on a 4.0 scale	3.5 on a 4.0 scale
ACT/SAT Score [excluding scores from the writing sections]*	27 ACT / 1210 SAT	27 ACT / 1210 SAT
Additional Assessment <div style="border: 1px solid black; padding: 5px; display: inline-block;">Ohio Department of Education May 4, 2007</div>	Not applicable	Achieve proficiency benchmark established for appropriate Ohio Career-Technical Competency Assessment or equivalent

Subject	STEM Honors Diploma	Arts Honors Diploma	Social Science and Civic Engagement Honors Diploma
Math	5 units	4 units	4 units
Science	5 units, including 2 units of advanced science	3 units, including 1 unit of advanced science	3 units, including 1 unit of advanced science
Social Studies	3 units	3 units	5 units
World Languages	3 units of one world language, or no less than 2 units of each of two world languages studied	3 units of one world language, or no less than 2 units of each of two world languages studied	3 units of one world language, or no less than 2 units of each of two world languages studied
Fine Arts	1 unit	4 units	1 unit
Electives	2 units with a focus in STEM	2 units with a focus in fine arts	3 units with a focus in social sciences and/or civics
GPA	3.5 on a 4.0 scale	3.5 on a 4.0 scale	3.5 on a 4.0 scale
ACT/SAT	ACT: 27 or higher/SAT: 1280 or higher	ACT: 27 or higher/SAT: 1280 or higher	ACT: 27 or higher/SAT: 1280 or higher
Field Experience	Complete a field experience and document the experience in a portfolio specific to the student's area of focus	Complete a field experience and document the experience in a portfolio specific to the student's area of focus	Complete a field experience and document the experience in a portfolio specific to the student's area of focus
Portfolio	Develop a comprehensive portfolio of work based on the student's field experience or a topic that is related to the student's area of focus	Develop a comprehensive portfolio of work based on the student's field experience or a topic that is related to the student's area of focus	Develop a comprehensive portfolio of work based on the student's field experience or a topic that is related to the student's area of focus

See the Ohio Department of Education website for additional guidance on these criteria

****These criteria are considered in addition to fulfilling the graduation requirements listed on page 3 of this guide.****

POST-HIGH SCHOOL PLAN

A common question that you will have in planning your four-year program is “What courses should I take if I want to go to college?” “To Nursing School?” “To work immediately after high school?” The answers to these questions are not simple. There are many factors involved for each individual. There *are* some general trends, however, which might help you in making your decisions.

On the following pages are some general guidelines for courses you should take depending on your post-high school plans. Are you planning on attending a four-year college or university, attending a technical or trade school, or entering the workforce or military upon graduation? That decision will impact the coursework you will need to take while in high school.

Above all else, select courses that will challenge you. All of us occasionally seek the easiest path in accomplishing a task. However, this approach in your studies can create difficulties for you. You may become bored because your work is too easy, resulting in “mental laziness.” The human mind will grow only when it is challenged.

Attending a College, University, Trade or Technical School

If you are planning on attending any type of school after graduating from high school, there are many things to consider. First of all, colleges look at a number of factors in determining admission: what courses you take; performance in those courses (grade-point average); school recommendations; national test scores, etc. While there is no specific set of courses required by every college, some suggestions can be made. It should be noted that colleges are becoming increasingly selective and are commonly raising entrance requirements.

English/Language Arts

Because of the heavy emphasis on reading and writing at the college level, students must take at least four full years of English with emphasis on writing. These English courses can also be beneficial in the national tests for admission (S.A.T. and A.C.T.) College bound upperclassmen with excellent grades may choose courses for college credit by enrolling in the College Credit Plus (CCP) program at Lorain County Community College through Clearview High School.

Mathematics

To meet the minimum graduation requirements and to prepare for national testing, students should take at least Algebra/Geometry/Algebra II in order to be prepared in math. Students who are considering careers in Math, Science or Engineering are strongly encouraged to take Algebra 3/Trigonometry or Pre-Calculus.

Social Studies

In Social Studies, a student planning for college should select at least three credits and, if possible, four credits.

Science

Adequate science preparation should include at least three science courses. Biology, Chemistry and Physics are courses most colleges expect students to have experienced before enrolling.

Foreign Language/Reading

An area of some confusion is in Foreign Languages. In recent years many schools have re-introduced a Foreign Language requirement for college admission. Many of the best colleges still seek two or three years of a single language as a requirement. Students seriously considering college would be well advised to take a Foreign Language.

The Minimum Core for College Preparation in Ohio:

English	4 units	Social Studies	3 units
Math	4 units	Foreign Language	2 units
Science	4 units	The Arts	1 unit

COLLEGE ADMISSION CHECKLIST

When to Begin?	What to Do?	How to Do It?
Freshman and Sophomore years	Learn about college requirements and continue exploring careers. Which high school courses satisfy college requirements? Are you involved in extracurricular activities?	Create a four-year high school curriculum plan. Try job shadowing. Get involved at school and in your community.
Junior Year: September–March	Think about your reasons for going to college. What are your goals? What learning opportunities are most important? Do your college plans include career plans?	Talk with your parents/guardians, counselors, teachers and friends. Investigate possible career options and degree level required.
Junior Year: January–March	Identify important factors in choosing a college. Two-year or four-year? Location? Cost? Kind of atmosphere > Variety of study programs available? Entrance test requirement?	Focus on your goals and career interests. Consult college guidebooks. Explore colleges on the internet. Prepare and register for the ACT.
Junior Year: March–August	List colleges you are considering and collect information. Have you included all possible choices? What information do you need? How can you get it?	Attend college fairs and college night programs. Prepare for and visit colleges. Take the ACT.
Senior Year: September–December	Compare the colleges on your list. Have you weighed pros and cons carefully? Which colleges will meet your needs?	Continue visiting colleges. Organize information into detailed, useful comparisons. Research scholarships.
Senior Year: August–December	Apply for admission to your “choice” colleges. Do you have all the necessary forms? Are you sure of the application deadlines?	Attend Financial Aid Night. Obtain application forms. Observe deadlines. Submit transcript and test scores (retest if necessary). Research scholarships.
Senior Year: October–February	Apply for financial aid. Have you investigated all possible sources of aid? When should you apply?	Consult financial aid office. Secure forms and note deadlines. Complete the FAFSA as soon as possible after October 1st.
Senior Year: November–May	Make some final decisions. What additional final preparation might be helpful? Should you consider summer school? Do you feel comfortable with your final choice?	Confer with parents/guardians and counselors. Confirm your decision, and decline other admission offers. Show initiative.

(From ACT.org)

POTENTIAL COLLEGE ATHLETES - NCAA Clearinghouse Information

In order to participate at the college level in NCAA Division I or Division II athletics, the athlete must be approved through the NCAA Clearinghouse. NCAA committees evaluate the student's transcript and ACT/SAT scores to determine if the high school student will be academically eligible for college athletics. It is the student's responsibility to register with the Clearinghouse at the beginning of his/her 10th grade year if he/she is considering continuing an athletic career in college. The information for registering for the NCAA Clearinghouse can be found online. Go to www.eligibility.org.

To qualify for Division I the student must have at least a 2.3 GPA at the end of your senior year in 16 core courses including:

4 years of English

3 years of Math (Algebra I or higher)

2 years of Natural/physical science

1 additional year of English, Math, or natural/physical science

2 years of Social Studies

4 years of additional courses (from any area above, or foreign language, comparative religion or philosophy)

Earn a minimum required grade-point average in your core courses; and Earn a combined SAT or ACT sum score that matches your core-course grade-point average and test score on the sliding scale

To qualify for Division II the student must also have at least a 2.0 GPA but there is not a sliding scale. A minimum SAT score of 820 combining Math and Verbal sections only and the minimum ACT sum score of 68.

All students who are considering playing in college should register at the beginning of their sophomore year regardless of grades and test scores because they may improve during their junior and senior year.

NCAA Division III does not use the NCAA Clearinghouse. Contact your Division III College regarding its policies on admission, financial aid, practice and competition.

Entering the Work Force/Trade or Technical School

If you are not planning to go to college, then you need to consider a program that will qualify you for immediate employment or for additional training in a technical program. Employers look at certain factors in determining employability: job skills, attendance record, school recommendations, performance in courses, etc. Students can acquire these needed skills through programs offered at the Joint Vocational School (JVS) and through work-study placements that are part of the Clearview High School, Career Based Intervention (C.B.I.) program. With careful planning, you can prepare yourself for meaningful employment.

English/Language Arts

In virtually every area of work, initial employment and job promotion are enhanced by strongly developed skills in reading, writing, speaking, and computation. For this reason every student should concentrate his/her efforts in taking four years of English/Language Arts.

Mathematics

Once again, to meet the minimum graduation requirements and to prepare for national testing, students should take at least Algebra, Geometry and Algebra II in order to be prepared in math, but 4 credits of math are required.

Social Studies

In Social Studies, a student should select at least three credits and, if possible, four credits.

Science

Adequate science preparation should include at least three science courses. Physical Sciences and Biological Sciences and one elective in science would give students a good foundation.

Other Courses to Consider

Anyone who looks at the want ads in the newspaper has to realize that the demand for unskilled labor is virtually non-existent. Fast food employment and light factory assembly may be available. Be aware that these jobs are very competitive and pay, for the most part, a minimum wage. Employers are looking for skills. Your courses should be an attempt to develop some marketable skills by the time you graduate. Skill-oriented courses will complement a general education included in graduation requirements.

Employment surveys indicate that young people entering the job market today can expect to change jobs or occupations no fewer than seven times in their lifetime. Success in the job market will depend upon good educational preparation, good work habits as demonstrated in attendance, consistent performance and adaptability

AVAILABLE COURSES for the 2018-2019 School Year

This is a list of courses offered in the 2017-2018 School year. Other courses may be listed in the course descriptions but are not being offered this year. Years listed in parentheses are recommended times for taking courses. However, any student may elect any course provided he/she has the recommendation of the teacher and/or Guidance Counselor based upon ability and completion of prerequisites. Courses may or may not run depending on the number of student requests.

GRADES, G.P.A. AND CLASS RANK Calculations and Formulas

CALCULATING A COURSE SEMESTER GRADE:

Multiply each quarter grade by 4 and the semester or final exam by 2.

Add the totals together and divide by 10.

GRADE AVERAGES

A = 3.51 - 4.00

B = 2.51 - 3.50

C = 1.51 - 2.50

D = 0.57 - 1.50

F = 0.00 - 0.56

$$\begin{array}{r} \text{EXAMPLE : } Q1(4) + Q2(4) + EX(2) = (10) \\ \quad \frac{A(4)}{16} + \quad \frac{B(3)}{12} + \quad \frac{B(3)}{6} = 30 \end{array}$$

$$30/10 = 3.0 = B$$

CALCULATING G.P.A. and DETERMINING CLASS RANK:

Class rank is computed at the end of the first semester and at the end of the school year. G.P.A.s are calculated and put in numerical order from highest to lowest. All courses (with the exception of Pass-Fail courses) are included.

The numerical equivalents for grades are: A = 4, B = 3, C = 2, D = 1, F = 0.

(A plus or minus does not affect the numerical equivalent.)

The following formula is utilized for calculating quarter and cumulative G.P.A.:

Add for all Courses Attempted: (Course Semester Grade x Credit Value) / (Total Credits Attempted) = G.P.A.

Important Notes:

The following courses will have a weighted credit value of .5: Algebra II H, Algebra III, Geometry H, Pre-Calculus, English 9 Pre AP, English 10 Pre AP, English 11 Pre AP, Advanced Global Studies, Advanced Physical Science, Physics, Forensics, Spanish III and Spanish IV. CCP Courses & AP courses will have a weighted value of 1.0.

IMPORTANT POINTS OF INFORMATION

1. In order to qualify as class Valedictorian or Salutatorian, students must complete four full semesters of coursework at Clearview (and/or CCP) during their Junior and Senior years.
2. CCP courses will be weighted one full grade point for high school credit.
3. The following courses will be weighted for enhanced Grade Point Average credit: English 9A, English 10A, English 11A, Geometry H, Algebra III/ Trigonometry, Pre-Calculus, Algebra II H, Advanced World History, Adv. American History, Adv. Government, Adv. Economics, Forensics, Spanish III, Spanish IV, and any CCP courses taken at LCCC or Clearview.

ACADEMIC HONORS **Qualifications and G.P.A. Requirements**

EXCELLENCE ROLL:

To qualify for the Excellence Roll, a student must have received a 4.00 or higher grade average for the grading period.

HONOR ROLL:

To qualify for the Honor Roll, a student must have received a 3.5 - 3.99 grade average for the grading period.

MERIT ROLL:

To qualify for the Merit Roll, a student must have received a 3.00 - 3.49 grade average for the grading period.

Students with qualifying GPA's at each grade level will be given academic excellence awards at the Annual Honor's Banquet in the Spring of the school year.

ADDING AND DROPPING COURSES **Timelines, Fees and Limitations**

1. **First two weeks of each semester:**
Elective Courses may be dropped with written permission from parent/guardian.
A minimum of 6 credits must be maintained for Freshman, Sophomore and Juniors. 5 credits for Seniors.
2. **Third week through the ninth week of each semester:**
A parent conference is required. Administrative and teacher permission is required to drop a course.
3. **Ninth week through the eighteenth week of each semester:**
Teacher and administrative conference must take place.
4. **Administrative Fees for Dropping a Course:**
Following the initial scheduling appointment, schedule drops requested by either the student or the parent will require a \$5.00 fee payable in advance.
5. **Failure of one semester of a year-long course:**
Students who pass only one semester of a year-long course (2 semesters) will receive credit for the passed semester and will be required to repeat the semester that was failed as early as possible.
6. **"Advanced" level courses:**
Transfers in or out of all "advanced" level courses are not considered Drop/Add transactions. Teacher approval is required for all transfers involving "advanced" level courses.
7. Students may not drop courses required for graduation.
8. A student who is in academic good standing may choose to audit a course. The decision must be made by the 3rd week of each semester and must come with a note from home and given to the guidance office.

Credit Recovery

If a student fails a class he/she will be allowed to repeat the class once here at Clearview High School. If he/she fails to pass the class on the second try, the child must take the class in summer school or as a credit recovery class. Clearview High School offers credit recovery coursework through PLATO Learning, an online learning platform. Students who wish to make up failed courses will be charged \$50 per ½ credit with a maximum charge of \$150. Students who have more than 3 half credits to make up will only be charged \$150. Students must find time on their own to work on their online courses and must be willing to take all locked tests after school during Clearview Academy hours (3-6pm Monday-Thursday).

COURSE AUDIT

A course audit is defined as being the process by which a student participates in all phases of a given course, but does not receive an official grade or course credit. Students who wish to audit a course must submit an Course Audit Form within the first 3 weeks of the course start date. The approval of the auditing process is subject to the approval of the principal. Audited courses will not count toward athletic eligibility. Audited Courses will be listed on the transcript as an “audited” course. **Students will receive a “pass” or “fail” grade**, but will not receive Carnegie unit academic credit for the audited course.

ACADEMIC ELIGIBILITY **O.H.S.A.A. Requirements**

According to the Ohio High School Athletic Association (O.H.S.A.A.) all students must meet the following requirements to be eligible to participate in high school athletics:

Students must receive passing (A, B, C, D) in a minimum of FIVE one-credit courses or the equivalent in the immediately preceding grading period. In addition to the OHSAA requirements, the *Principal and/or Athletic Director* reserve the right to place any student on academic probation if they did not earn a minimum of 1.5 GPA. The length of time for academic probation will depend on the progress of the student.

(Summer school classes do NOT count towards this requirement.)

Determination and enforcement of eligibility for athletics is to be completed by the athletic director by the fourth day following the end of a grading period.

APPLYING TO THE J.V.S. Procedures for Applying

Students normally apply to the J.V.S. during Second Semester of their Sophomore year. Students may apply for the JVS Career Readiness (available for freshmen) and Career Explorations (available for sophomores) programs during their 8th and 9th grade year. Enrollment in all JVS programs is limited.

Selection is based on performance during the freshman and first semester of the Sophomore year in attendance, grades and high school credits.

Students applying to the J.V.S. should have completed English 9, English 10, two credits in Mathematics, two credits in Science, two credits in Social Studies, one-half credit in Physical Education and one-half credit in Health.

Students interested in applying for the J.V.S. should see their Guidance Counselor for more information.

JOINT VOCATIONAL SCHOOL Available Programs at the J.V.S.

If accepted, Clearview High School Juniors and Seniors may attend one of the many two-year vocational programs at the J.V.S. These include:

<p><u>MANUFACTURING & PRE-ENGINEERING</u></p> <p>Computerized Design & Drafting Precision Machine Technology Welding/Fabrication</p>	<p><u>BUILDING TRADES</u></p> <p>Carpentry Heating/Air Conditioning Industrial Electricity Masonry Trades Plumbing/Pipefitting</p>
<p><u>CULINARY</u></p> <p>Bakery/Pastry Arts Culinary Arts</p>	<p><u>BUSINESS & MARKETING</u></p> <p>Web & Graphic Design Marketing/Management</p>
<p><u>COMMUNITY SERVICE ACADEMY</u></p> <p>Cosmetology Early Childhood Education Public Safety Landscape & Greenhouse Management</p>	<p><u>TRANSPORTATION</u></p> <p>Auto Technology Collision Repair Technology Commercial Truck Technology Industrial Equipment Mechanics</p>
<p><u>ONE-YEAR PROGRAMS</u></p> <p>Career Based Intervention Teacher Education Exploration Career Exploration (10th Grade) Career Readiness Lab (9th Grade) Job Training Hospitality Service (A & B) Building Maintenance Services</p>	<p><u>COLLEGE TECH PREP</u></p> <p><i>1/2 day JVS Lab with 1/2 day Home School Academics</i> Allied Health Sciences Interactive Multimedia Technology Project Lead the Way Pre-Engineering Network Communications Technology Sports Health Fitness Technology (at CHS)</p>

COLLEGE TECH PREP PROGRAM

Information and Qualifications to Enroll

College Tech Prep (CTP) programs are a unique educational option for the last two years of high school. It is designed for students who plan to go to college - but who want to actually **experience** a particular career before investing in college. The program combines traditional, college-preparatory academics with intense, lab-based instruction in the career of choice. Because of the need for specialized lab facilities, 1/2 of the day is normally spent at the home school for academics. The other 1/2 day is spent at the Lorain County JVS. Specific "Satellite" programs at Clearview, Firelands, and Steele high schools offer both academics and lab coursework at the same site. Learning in CTP programs is hands-on and challenging, with the opportunity to earn articulated college credit for work completed at the high school level. Students best suited for College Tech Prep are those who are active, experiential learners; who like building, designing, and "tinkering", and who learn best by applying their knowledge to real-life situations.

Enrollment in College Tech Prep programs is competitive, and generally requires:

- a solid GPA (approximately 2.75 or above)
- completion of at least Algebra I with a grade of "C" or better
- Junior standing at the end of 10th grade
- completion of Biology with a "B" or better (Allied Health Sciences & SHFT Sports Health Fitness Tech @ CHS)

Allied Health Sciences (AHS): Gives students a solid foundation on exciting health and medical careers as it integrates rigorous academic preparation with hands-on technical instruction. Students are exposed to a wide variety of careers, exploring roles of many health care related jobs and the required training and education for those careers. They will learn about medical ethics, infection control, safety, body mechanics, nutrition, communication, employability skills, teamwork, and professionalism.

Engineering Technologies/Project Lead the Way (PLTW): Designed to help students succeed in engineering, science and technology careers. PLTW begins at your home school with an Introduction to Engineering Design course in your sophomore year. Then you take your junior and senior PLTW courses at Lorain County JVS. Academic courses are taken at your home school or LCCC. This helps you fit PLTW into your schedule.

Network Communications Technology (NCT): Students become skilled in finding and fixing problems for large companies and individual computer owners. They learn to link computers in a business to one another and how to troubleshoot to repair computer networks. Students learn to use components, which allow the transfer of information on the network. College credits are available upon successful completion of this program

Digital Media Arts (DMA):

Provides the fundamental principles and processes of computer-based design using a variety of traditional and nontraditional media with an emphasis on problem solving and creative exploration. Students work in a digitally integrated computer lab using such media as high-definition video, sound, animation, installation art, print & digital photography.

Sports, Health and Fitness Technology (SHFT): This is a college preparatory program for students interested in the field of Sports Medicine, Physical Therapy, or other Allied Health professions. This program is a mix of lab and classroom instruction covering topics in Anatomy & Physiology, Health & Wellness, First Aid & CPR, Strength & Conditioning, Nutrition, Injury Evaluation, and Rehabilitation.

Teacher Education Exploration Program (TEE)

The Teacher Education Exploration Program is designed to encourage interested high school seniors to enter the teaching profession by providing them with the support and training necessary for success as both students and teachers. The students enrolled in the TEE Program will intern in all grade levels, from kindergarten through high school.

Students enrolled in the Teacher Education Exploration Program will receive three vocational credits. The Program consists of classroom time and internship experience for three periods per day.

Teacher Education Exploration curriculum will be taught as an online course offered through Lorain County JVS's website. The students will also meet with the TEE Program teacher to gather information, concepts, and theories related to teaching, learning, and children.

The best way to learn how to teach is to observe experienced and enthusiastic teachers, and to talk to them about what they do. Students will learn to apply information, concepts, and theories to real-life contexts. TEE students will be placed in K-12 classrooms as interns with each placement lasting approximately four weeks. At the end of the year, the student will be able to revisit his/her favorite grade level or area.

For students the Program has the following goals:

- Ensure college readiness and exposure to college
- Provide education related to teaching and learning
- Provide internship experience under the guidance of an experienced teacher
- Promote positive attitudes toward teaching

COLLEGE CREDIT PLUS (CCP) (Formally known as P.S.E.O.)

College Opportunities for High School Students: The CCP program is sponsored by the State of Ohio through the Ohio Department of Education. The program has two components:

OPTION A (Student Paid)

Option A permits eligible students to enroll in college courses for college credit. Students electing this option **will** be required to pay all costs incurred, including tuition, books, materials and fees.

OPTION B (Government Paid)

Option B permits eligible students to enroll in college courses for college **and** high school graduation credit. Students electing this option will **not** be required to pay for tuition, books, materials or fees associated with such courses. Students may need to pay for equipment which they keep, such as tools, calculators, etc.

All CCP students will be required to complete the LCCC assessment process. (Accuplacer)

PROCEDURES FOR APPLYING:

1. Attend an LCCC informational meeting.
2. Submit **Intent to Participate form** a statement certifying their understanding of the responsibilities involved in the CCP program by March 30th.
3. Submit an application to LCCC
4. Take the LCCC Accuplacer Test.
5. Meet with your school counselor and LCCC advisor to schedule courses

***Students must be admitted by an eligible post-secondary institution. All college courses must be verified by the high school guidance counselor before students can register for them.

***Students who do not meet the CCP filing date will not be permitted to participate. Late applications will NOT be accepted for any reason.

*****Students and parents may be held responsible for payment of CCP courses that are failed or withdrawn.*****

COURSE DESCRIPTIONS

Not all courses are offered every year. Please refer to the list of courses available in the upcoming school year to help plan your selections.

ENGLISH

SUMMER READING: ALL English classes at Clearview High School will have a **SUMMER READING REQUIREMENT.** Advanced English students will have to purchase their own copies of the summer reading books. On-Level English classes will have the books provided to them from the CHS Library, and are due back to the library upon return to school in August. There will be an assignment(s) to complete over the summer based on the required reading. This assignment(s) are due on the first day of school in August. There will also be an assessment given over the reading.

ENGLISH 9

2 Semester Course(1/2 credit per semester)

The course is designed to emphasize grammar, composition, vocabulary, and literature for Freshman.

Grammar and Composition: Emphasis will be upon stimulating interest in writing, providing new and varied experiences, and building strong vocabulary. Stress will be placed on writing content and response to prompts. Parts of speech and sentence structure will also be a major component of this course. Students successfully completing this section of the course should be able to express their ideas in an original and imaginative manner.

Literature: This section of the course will survey the major forms of literature including the short story, poetry, novel, epic, drama and the nonfiction essay. Basic construction of these forms and their terminology will be studied. The students will be expected to master a vocabulary list of that terminology.

Prerequisite: None

Fee: None

ENGLISH 9 ADVANCED

2 Semester Course(1/2 credit per semester)

English 9A is a challenging course that will allow students to learn and use advanced strategies in writing and reading. What makes “regular” English classes different from advanced English classes is the intensity and depth of analysis of fiction and nonfiction works, as well as the high degree of rigor and relevance of coursework that the instructor of an advanced English class can provide for your child. Students will read novels, non-fiction works, poetry, and drama. Students will also complete projects using technology, and will conduct research using many sources. Grammar and vocabulary study will help sharpen your child’s reading and writing skills as well.

Literature: This section of the course will survey the major forms of literature including the short story, poetry, novel, epic, drama and the nonfiction essay. Students will also begin to think analytically about literature. Basic construction of these forms and their terminology will be studied. The students will be expected to master a vocabulary list of that terminology.

Prerequisite: Students will be recommended to take advanced courses based on State assessments and standardized testing scores.

Fee: \$10.00

ENGLISH 10

2 Semester Course(1/2 credit per semester)

The course is designed as a continuation of English 9. Composition and Literature are emphasized.

Composition: Emphasis will be upon the effective communication of factual information through accepted formats, clarity, brevity, conciseness, and objectivity. By successfully completing this section students should be able to communicate factual information accurately in a variety of ways: the paragraph, the short essay and extended response.

Literature: A more detailed examination of the method and interpretation of literature will be provided. Materials will include the short story, poetry, drama, the nonfictional essay, and the novel. Students successfully completing this section should be able to identify the various techniques of literature and to explain passages of literature.

Prerequisite: None
Fee: None

ENGLISH 10 ADVANCED

2 Semester Course(1/2 credit per semester)

The focus of the tenth grade year is a continued mastery of reading and writing skills. The goal is an increased competency in critical thinking, critical reading, and critical writing. Students will produce essays in a variety of rhetorical forms, sentences of greater sophistication, and more difficult and varied analysis of literature: fiction and nonfiction, poetry and prose. Vocabulary and grammar study will continue.

Prerequisite: Students will be recommended to take advanced courses based on State assessments and standardized testing scores.
Fee: \$10.00

ENGLISH 11

2 Semester Course(1/2 credit per semester)

The course emphasizes American Literature and the historical and social issues relevant to the literary time periods. Students will be required to read selections from the different genres and respond in writing to specific prompts. Students will also be required to improve their writing, analysis, and vocabulary skills.

Prerequisite: None
Fee: None

ENGLISH 11 ADVANCED

2 Semester Course(1/2 credit per semester)

This course challenges College bound students to do in-depth reading and writing through the study and analysis of American literature: poetry, short stories, novels, drama, and non-fiction prose. Analysis of literature and vocabulary study be the major focus of the course. Students taking this course should be highly motivated to improve their analytical thinking and writing skills.

Prerequisite: Students will be recommended to take advanced courses based on State assessments and standardized testing scores.
Fee: \$10.00

ENGLISH 12

2 Semester Course(1/2 credit per semester)

This course is designed for general English students. Practical experience using vocabulary, reading, and writing are part of the weekly routine. In addition students in this course will complete functional documents, respond to literature, and compose reflective writings.

Prerequisite: None
Fee: None

ENGLISH 12 ADVANCED

2 Semester Course(1/2 credit per semester)

This course is designed for those students who plan to attend college. Analysis, synthesis, critical thinking, and collaborative learning are emphasized. The major requirement is a research paper and for sizing correct use of sources, note-taking, and citing.

Prerequisite: Students will be recommended to take advanced courses based on State assessments and standardized testing scores.
Fee: None

CCP ENGL 161 - COLLEGE COMPOSITION I

1 Semester Course (1 HS Credit, 3 College Credits)

An introduction to fundamental college-level skills in academic reading and writing. Summary, analysis, synthesis, and research documentation are emphasized, along with critical thinking and collaborative learning. English Core Course.

Prerequisite: Course placement policy: Placement on the LCCC assessment

CCP ENGL 162 - COLLEGE COMPOSITION II

1 Semester Course (1 HS Credit, 3 College Credits)

A writing course continuing the practice of skills introduced in ENGL 161, as well as strategies of argumentation and secondary research leading to a research paper. English Core Course.

Prerequisite: Prerequisite: ENGL 161

ENGLISH ELECTIVES

DEBATE

1 Semester Course(1/2 credit)

In this course, students will learn the skills of argumentation, debate, and critical thinking. This course provides instruction and practice in the art of formal and informal debate and focuses on the in-class debating of major issues surrounding current events. This is an elective course for students in grades 10-12.

Prerequisite: None
Fee: None

INTRA/INTERPERSONAL COMMUNICATION

1 Semester Course(1/2 credit)

Public speaking is a primary fear for most people. Students will conquer this fear. In this course, students will be immersed in the experience of speaking one-on-one, in a partnering and in front of larger groups by the end of their learning process. This course will begin with the basics of communication, analyzing the vast differences between intrapersonal and interpersonal communication, dissecting and experimenting with each. Through this practice, students will better develop writing, speaking, and listening skills. The course will include several informal speaking exercises, including an impromptu speech. Additionally, students will practice using props, their peers and the course will close with one formal speech, with the main focus chosen from a list of diverse topics. This is an elective course for students in grades 10-12.

Prerequisite: None
Fee: None

HOLOCAUST LITERATURE AND EXPLORATION

1 Semester Course(1/2 credit)

Many students are quite familiar with the historical facts surrounding the Holocaust. Students will build on prior knowledge and be given a new stance on the topic of the Holocaust however; exploring not only literature in the form of two texts, but also poetry, artwork, film and other first hand samples from one of history's darkest events. In this course, students will be immersed in first-hand stories and experiences of these individuals, of all age groups and ethnicities. This course will begin with a very brief refresher of the main events leading up to the Holocaust, followed by in depth analysis of the primary texts, and other varying artifacts of this time period. Through these examinations, students will better develop analytical, writing and listening skills while gaining a deeper meaning and understanding of the creative outcomes of this horrific event. **A tablet or phone with internet capabilities is a necessity for this course.** This is an elective course for students in grades 10-12.

Prerequisite: None
Fee: None

MINORITIES IN LITERATURE

1 Semester Course(1/2 credit)

This multi-genre literature course is a study of significant writers and selected works presenting diverse groups based on race, ethnicity, gender, class, culture, etc. Students will explore a variety of literature, analyzing each piece for voice and identity. Through discussions of literature, the origins, contributions and the changing dynamics of specific groups in the United States will be studied. Assignments will include writing current event articles, personal responses, and creative writing; a thematic project will serve as the final exam.

Prerequisite: None
Fee: None

FILM AS LITERATURE

1 Semester Course (1/2 credit)

In this semester long course, students will view and analyze a variety of films. Students will learn to recognize story-telling elements and make critical observations about social, historical, economic, political and artistic issues presented in cinema. Analytical, argumentative and persuasive writing will be the primary assessment tools.

Prerequisite: None
Fee: None

YEARBOOK & PUBLICATIONS

2 Semester Course (1/2 credit per semester)

Students will be responsible for all aspects of yearbook publishing including writing feature stories, gathering information, designing pages, covering events and organizations, sales, advertising, and promotions. Students will have opportunities to accept leadership positions such as editor, business manager, and sales director while developing critical thinking, problem solving, management, and team building skills. In addition, students will explore and develop skills in journalism writing, reporting and interviewing. Students will learn about photojournalism while developing an understanding in journalism law and ethics, journalism culture and types, and journalism occupations. Students are responsible for producing the school newspaper and the school yearbook. Independent study available with instructor permission. This class is a year long commitment.

Prerequisite: None
Fee: None

MATH

Students will be placed into Math courses based on student data including state testing results. The student's post-secondary goals will also be taken into consideration. ***The math department suggests students purchase a graphing calculator for use in all math classes.**

CONCEPTS OF MATHEMATICS

2 Semester Course(1/2 credit per semester)

In this course we will fill in those gaps that will promote your success in high school math. The goal is to help the student keep up and succeed with the pace, rigor and accountability of the regular high school course. The teacher uses scientifically proven teaching strategies that allow students this additional time to learn math. This course will help the student be more prepared for the required state assessment. Students in this course will also be enrolled in Algebra I.

ALGEBRA I

2 Semester Course (1/2 credit per semester)

Algebra 1 is a study of the Algebra 1 Common Core Standards. The course will focus on these standards and prepare the student for Geometry. Emphasis will be placed on solving equations, graphing linear equations and quadratics, and the simplification of expressions.

MODIFIED GEOMETRY

2 Semester Course (1/2 credit per semester)

Based on the Common Core Geometry Standards, the purpose of this course is to formalize and extend students' geometric experiences. Main topics in this course will cover congruence, proofs, geometric constructions, similarity, right triangle trigonometry, three-dimensional objects, circles, and applications of probability.

Prerequisite: Algebra I
Fee: None

GEOMETRY

2 Semester Course (1/2 credit per semester)

Based on the Common Core Geometry Standards, the purpose of this course is to formalize and extend students' geometric experiences. Main topics in this course will cover congruence, proofs, geometric constructions, similarity, right triangle trigonometry, three-dimensional objects, circles, and applications of probability. Algebra skills are expected to be carried through from the previous year. **Every student is required to have a scientific calculator.**

Prerequisite: Algebra I
Fee: None

ALGEBRA II A

2 Semester Course (1/2 credit per semester)

This is the first course in a two part series designed to cover the topics of the traditional Algebra II course over the course of two consecutive years. The course will begin with a review of Algebra I topics. Linear Algebra, Systems of Equations, Quadratic Equations, Radical Functions, Radical Exponents, Rational Functions and Matrices will be covered.

***TI Graphing calculator required for this course**

Prerequisite: Algebra I

Fee: None

ALGEBRA II B

2 Semester Course (1/2 credit per semester)

This is the second course in a two year series designed to cover the topics of the traditional Algebra II course. This course will be a continuation of Algebra II and will begin with a general review of the topics covered in Algebra II A. This course will introduce Polynomials and Polynomial Functions, Exponential and Logarithmic Functions, Quadratic Relations, Sequences and Series, and a unit on Probability and Statistics. The course will end with a basic introduction to Trigonometric Functions. Technology will be used to supplement the course.

***TI Graphing calculator required for this course**

Prerequisite: Algebra 2A

Fee: None

ALGEBRA II

2 Semester Course (1/2 credit per semester)

Building on the Algebra I standards and in conjunction with Common Core Standards, students in Algebra II extend their math skills to include polynomial, rational and radical functions, along with an introduction to trigonometric functions and statistics/probability.

***TI Graphing calculators required for this course**

Prerequisite: Algebra I

Fee: None

ALGEBRA III / TRIGONOMETRY

2 Semester Course (1/2 credit per semester)

Algebra III - This course will cover functions (graphics), conic sections, quadratic relations, sequence and series, exponential functions, logarithmic functions, and probability and statistics.

Trigonometry - we will explore trigonometric functions and their graphs with real world applications, solve triangles (right and oblique) solve trigonometric equations, define the properties and identities of sine, cosine, and tangent, find area of triangles using properties sine, cosine, and tangent, and explore inverse trigonometric functions.

***TI Graphing calculators required for this course**

Prerequisite: Algebra II

Fee: None

ALGEBRA II HONORS

2 Semester Course (1/2 credit per semester)

Building on the Algebra I standards and in conjunction with Common Core Standards, students in Algebra II extend their math skills to include polynomial, rational and radical functions, along with an introduction to trigonometric functions and statistics/probability. This course is an honors tracked course and will use the advanced standards found in the Common Core Algebra II standards.

***TI Graphing calculators required for this course**

Prerequisite: Algebra I
Fee: None

TRANSITION TO COLLEGE MATHEMATICS

2 Semester Course (1/2 credit per semester)

This course will cover basic trigonometric ratios, functions, graphs and identities. It will also cover probability and statistics, begin a working knowledge of matrices, and logarithms functions. This course will begin a foundation for college mathematics courses.

***TI Graphing calculators required for this course**

Prerequisite: Algebra II
Fee: None

GEOMETRY H

2 Semester Course (1/2 credit per semester)

This course will cover the same topics as the regular geometry course but will study the topics more thoroughly. There will be a heavier focus on formal proofs and applications. Problems with more algebraic manipulations will be investigated. This course is an honors tracked course and will use the advanced standards found in the Common Core Geometry standards. **Every student is required to have a scientific calculator.**

****The math department suggests students purchase a graphing calculator for use in class.***

Prerequisite: Honors Algebra II
Fee: None

PRE-CALCULUS

2 Semester Course (1/2 credit per semester)

This course is a study of trigonometry and in-depth look at advanced algebraic functions. Students who plan on taking Calculus during their freshman year in college are recommended to take this course. Rigor will be based according to preparing students for calculus and a solid math base is expected. The topics studied in this course include: polynomials, logarithms, exponential functions, trigonometric functions, probability and statistics, and other advanced concepts.

****TI graphing calculators are required.***

Prerequisite: Algebra II
Fee: None

SOCIAL STUDIES

WORLD HISTORY

2 Semester Course (1/2 credit per semester)

This is a survey course that will develop and reinforce Social Studies knowledge and skills through World History, Economics, World Geography and Governments. This course is required for students entering starting High School in the 2017-2018 school year.

Prerequisite: None
Fee: None

ADVANCED WORLD HISTORY

2 Semester Course (1/2 credit per semester)

This is a survey course that will develop and reinforce Social Studies knowledge and skills through World History, Economics, World Geography and Governments.

Prerequisite: Students will be recommended to take advanced courses based on State assessments and standardized testing scores.
Fee: None

AMERICAN HISTORY

2 Semester Course (1/2 credit per semester)

This course traces the development of our American heritage from the beginning of Reconstruction (1865) to the making of American History today. Emphasis will be based on three major areas: (1) understanding our distinct American culture (2) tracing the growth and transformation of the United States from a rural to an urban, industrial society and on (3) developing an awareness of United States' role in the world of today. American History from the Revolution and through the Civil War will be reviewed. Students completing the course successfully should be able to define terms of historical importance and to explain the historical development of key themes in America's growth. This course is required for graduation.

Prerequisite: None
Fee: None

ADVANCED AMERICAN HISTORY

2 Semester Course (1/2 credit per semester)

American History Honors is an in-depth examination of U.S. history from 1877 to the present, from the Industrial Age to the Modern Era. Within that framework, a comprehensive analysis of American cultural, social, economic, and political institutions will be considered alongside the major domestic and foreign policies of the 20th Century.

Prerequisite: Students will be recommended to take advanced courses based on State assessments and standardized testing scores.
Fee: None

AMERICAN GOVERNMENT

1 Semester Course (½ Credit)

This course surveys the principles and practices of national, state and local government. Students completing the course successfully should be able to identify key federal, state and local governmental actions and services that affect their life as a citizen of the United States.

Prerequisite: None
Fee: None

ECONOMICS and FINANCIAL LITERACY

1 Semester Course (½ Credit)

A course required to qualify for graduation. This course is designed to assist students to understand and make reasoned judgments about major economic questions facing society. Topics will include basic economic principles and problems. The principles of microeconomics and macroeconomics will be investigated.

Prerequisite: None
Fee: None

ADVANCED AMERICAN GOVERNMENT

1 Semester Course (½ Credit)

This course, designed for highly motivated students, probes, investigates, and surveys the principles and practices of our national, state, and local governments. Students will obtain a full and complete understanding of actions and government services that have affected Americans in an historic as well as current perspective. Ultimately, one of the major goals of the course is to encourage greater-future political participation and reduce political apathy. The collective and politically neutral concept of “We the People,” is highlighted throughout our coursework.

Prerequisite: 11th-12th grade, 3.5 Cumulative GPA, Students will be recommended to take advanced courses based on State assessments and standardized testing scores.
Fee: None

ADVANCED ECONOMICS

1 Semester Course (½ Credit)

This course, designed for highly motivated students, identifies and analyzes the major economic features of American society. Our investigations and research topics will include the basic-fundamental concepts of Macroeconomics and Microeconomics. However, not only will this course focus on these laws, financial concepts, and theoretical applications, but as well, we will enter the arena of consumer economics and marketplace realities. Now more than ever before, America is engaged in a world market of products, services, supplies, and competition. We will probe, investigate, and analyze the nuances of these phenomena.

Prerequisite: 11th-12th grade, 3.5 Cumulative GPA, Students will be recommended to take advanced courses based on State assessments and standardized testing scores.
Fee: None

SOCIAL STUDIES ELECTIVES

WORLD GEOGRAPHY

1 Semester (½ Credit)

Primarily this course, Human geography, is designed to introduce students to the systematic study of patterns and processes that have shaped human understanding, human use, and human alteration of the Earth’s surface. Students will learn about and employ the methods of geographers. These include observation, mapmaking, data gathering and reporting, and technical writing. Students will also learn how to employ spatial concepts, geographic vocabulary, and landscape interpretations to a variety of location and situations around the globe as well as in local areas. Overall, students will develop a geographic perspective in their manner of thinking with which to view the landscape of the world and better understand current events.

Prerequisite: None
Fee: None

CCP PSYCH 151 *Introduction to Psychology

1 Semester Course (1 HS Credit, 3 College Credits)

An introduction to psychology as a science of behavior and an overview of current psychological thought. Topics include: the science of psychology, biological bases of behavior, learning, memory and cognition, motivation, stress and adjustment, personality, psychological disorders and their treatment and social psychology.

Prerequisite: Successful placement on the LCCC assessment
Fee: None

CCP PSYCH 251 * Human Growth and Development

1 Semester Course (1 HS Credit, 3 College Credits)

This course is the study of the phenomena of human growth and development and the influence of biological, cognitive, and psychosocial factors from conception throughout life. Topics include: prenatal development, infancy, childhood, adolescence, and adulthood. This is a Social Sciences Core Course.

Prerequisite: Psychology 151
Fee: None

PSYCHOLOGY

1 Semester Course (½ Credit)

This course examines the role of the individual in society. Topics covered include development of the self-concept, psychological defense mechanisms, social psychology and personality aberrations. Students completing the course successfully should be able to define and explain in practical examples the concepts which govern individual behavior.

Prerequisite: None
Fee: None

SOCIOLOGY

1 Semester Course (½ Credit)

This course examines the values and customs which govern the development of a variety of social groups. Particular emphasis is placed upon the comparison and contrast of these groups. Students completing the course successfully should be able to describe and analyze the makeup and development of different social groups.

Prerequisite: None
Fee: None

MODERN WORLD HISTORY 90s to TODAY

1 Semester Course (½ Credit)

This class picks up where most high school history classes end by examining the collapse of the Soviet Union and the increased role of the United States as the world’s sole superpower. Gain a greater understanding of the “Wars for Oil”, The Bosnian Conflict, The rise of China and fall of American economic world dominance. Learn how events such as 9/11 and the London Tube Bombings gave rise to the never ending “wars on terror”. Discuss and debate topics such as government control of economic and social matters, climate changes, world population growth, the growing nuclear threat, and the modern American political landscape.

Prerequisite: None
Fee: None

WESTERN EXPANSION AND THE AMERICAN FRONTIER

Go back to the 1840's through the turn of the century and gain an appreciation how the American "wild" West was settled and tamed. Learn about this unique set of men and women such as Wild Bill Cody, Custer, Geronimo, and Sitting Bull just to name a few. Topics to discuss and debate include manifest destiny, genocide, The Indian Wars, The Mexican American War and many more!

Prerequisite: None
Fee: None

PRACTICAL LAW

1 Semester Course (½ Credit)

The goal of this semester course is to improve students' understanding of the fundamental principles and values underlying the legal system in the United States. The course is designed to provide a practical explanation of the basic areas of law, including business law, criminal law, consumer law, family law, torts, civil liberties and international law. Upon completion of the course, students will have an improved understanding of the roles that law, lawyers, law enforcement officers, and the justice system play in our democracy.

Prerequisite: None
Fee: None

SCIENCE

PHYSICAL SCIENCE

2 Semester Course(1/2 credit per semester)

This course lays the foundation for high school science through the study of introductory chemistry, physics and earth science. Students will learn laboratory techniques, how to use the periodic table, the method for notating chemical reactions, and how to measure forces and energy in the world. Laboratory experiments and reports are the primary mode of delivering and practicing concepts learned in physical science, and will be a substantial portion of student grades. **Students will be required to have a scientific calculator.**

Prerequisite: Grade 9
Fee: None

ADVANCED PHYSICAL SCIENCE

2 Semester Course(1/2 credit per semester)

This course lays the foundation for high school science through the study of introductory chemistry, physics and earth science. Students will learn laboratory techniques, how to use the periodic table, the method for notating chemical reactions, and how to measure forces and energy in the world. Mathematics and graphing will be utilized throughout the course. Laboratory experiments and reports are the primary mode of delivering and practicing concepts learned in physical science, and will be a substantial portion of student grades. **Every student is required to have a scientific calculator.**

***A TI Graphing calculator is recommended for this course.**

Prerequisite: Algebra I. Students will be recommended to take advanced courses based on State assessments and standardized testing scores.
Fee: None

BIOLOGY

2 Semester Course (1/2 credit per semester)

This class is designed to give the student a total outlook on life from the single cell to the complex organism of man. Emphasis is placed on molecular biology with laboratory exercises and dissection. Ohio Graduation Test outcomes will be the basis for the course and for attaining student success.

Prerequisite: None
Fee: None

CCP BIOG 151 GENERAL BIOLOGY

1 Semester Course (1 HS Credit, 4 College Credits)

An introductory biology course designed for non-science majors. Topics include basic chemistry and cell biology, evolution, genetics, ecology and a survey of the kingdoms. Laboratory required.

Prerequisite: Satisfactory Placement score on ACCUPLACER Test
Fee: None

CCP BIOG 152 - HUMAN BIOLOGY

1 Semester Course (1 HS Credit, 4 College Credits)

An introductory course intended for the non-science major covering basic anatomy and physiology of the human body. Laboratory with dissection of preserved specimens required.

Prerequisite: BIOG 151
Fee: None

CHEMISTRY

2 Semester Course (1/2 credit per semester)

A course which focuses on the study of the chemical composition, structure and interactions of matter. Emphasis is placed on logical thinking, problem-solving, laboratory techniques, chemical laws and behavior of chemicals based upon position in the Periodic Table. Students need a thorough comprehension of decimals, fractions, percents and must understand how to solve simple algebraic equations.

Prerequisite None
Goggles are **required** (can be purchased from teacher for \$5.00)
Fee: None

CCP CHMY 171 - GENERAL CHEMISTRY

1 Semester Course (1 HS Credit, 5 College Credits)

Course recommended for Science majors as an introduction to the principles of chemistry. Emphasis is on atomic, molecular, and electronic structures, gas laws, stoichiometry, chemical bonding, solutions, and equilibrium. Laboratory required. Natural Science Core Course.

Prerequisite: Satisfactory Placement score on LCCC placement test
Fee: None

SCIENCE ELECTIVES

CCP Biology 121 ANATOMY AND PHYSIOLOGY I

1 Semester course (1 HS Credit, 4 College Credits)

This course offers an introduction to cell biology and histology, as well as an in-depth study of the following human organ systems: integumentary, skeletal, muscular, nervous (including special senses), and endocrine. This course is intended primarily for Allied Health and Nursing associate degree students, Sports and Fitness Management students, and Science majors. Laboratory (involving dissection of specimens) required. Natural Science Core Course. (C3, IN1, IN5)

Prerequisite: Satisfactory Placement score on LCCC placement test
Fee: None

CCP Biology 122 ANATOMY AND PHYSIOLOGY II

1 Semester course (1 HS Credit, 4 College Credits)

This course is a continuation of Anatomy & Physiology I. The structure and function of the following human organ systems are examined; reproductive (including embryology and fetal development), digestive, cardiovascular, lymphatic (including immunity), respiratory, and urinary (including fluid/electrolyte and acid/base balance). Cadaver-based laboratory required. This is a Natural Science Core Course.

Prerequisite: Grade of C or better in BIOG 121
Fee: None

CCP BIOG 153 BASIC HUMAN NUTRITION (Online)

1 Semester Course (1 HS Credit, 3 College Credits)

Course designed for the non-science major to educate the consumer about normal physiological activities used to process food nutrients, dietary requirements for all stages of the human life cycle, and food safety. World hunger and global issues related to the food supply are also addressed.

Prerequisite: Satisfactory Placement score on LCCC placement test
Fee: None

CCP BIOG 159 AQUATIC LIFE (Online)

1 Semester Course (1 HS Credit, 3 College Credits)

Introductory course designed for non-science majors to explore various aquatic environments, with an emphasis on aquatic species and the interaction of humans with such environments. Laboratory required.

Prerequisite: Satisfactory Placement score on LCCC Placement test
Fee: None

CCP BIOG 150 INFECTIOUS DISEASES

1 Semester Course (.66 HS Credit, 2 College Credits)

Infectious Disease explores infectious disease and the response to it. Microorganisms including bacteria fungus protest virus and prions will be examined for the role they play. Microbial disease has played an extraordinary role in human evolution and it continues to produce much suffering in the world today. We will all need to prepare for the challenges of future epidemics that are occurring with greater frequency in the modern world. The stress of increased population, climate change and increased world travel and commerce will cause a greater disease burden in the coming years. This

course will explore interventions and simple ways of controlling, reducing or eliminating the threat. *Natural Science Core Course.* (C3, IN1, IN5)

Prerequisite: Satisfactory Placement score on LCCC Placement test

CCP ALHN 110 Medical Terminology (Online)

1 Semester Course (1 HS Credit, 3 College Credits)

This course will introduce medical terminology including common medical word roots, prefixes, suffixes and combining forms. It will include common medical abbreviations, pronunciation, spelling and definitions of medical terminology related to the human body systems. People who are pursuing an allied health or nursing program, or who are reentering health care professions or persons working in health care related agencies will enhance their knowledge of medical terminology in this course

Prerequisite: Satisfactory Placement score on LCCC Placement test
Fee: None

CCP ALHN 121 General Pathology

1 Semester Course (1 HS Credit, 3 College Credits)

Basic principles of pathogenesis are explored. This also includes the study of the clinical manifestations of diseases according to body systems, diagnosis, treatment, and surgical intervention for the specific disease processes. Previous or concurrent enrollment in BIOG 122.

Prerequisite:

Prerequisite: Prerequisite: BIOG 115 or previous or concurrent enrollment in BIOG 122.
Fee: None

GEOLOGY

1 Semester course (½ credit)

Geology is an in-depth study of the origin of rocks, landforms and the internal structure of the earth. Students will identify minerals, rocks and fossils common in Ohio. Students will learn to read topographic maps and understand the major events of the geologic time scale. Emphasis is placed on Ohio's fascinating geological history and how our geologic past impacts us today. Some math is applied to situations involving basic chemistry.

Prerequisite: Physical Science
Fee: None

ASTRONOMY

1 Semester course (½ credit)

This course will focus on the history of astronomy, the earth, moon, sun and other objects in our solar system. The interactions between the sun/earth/moon system, planetary processes, galaxy transformation and the origins of the universe are also examined. An emphasis will be placed on recent astronomical discoveries. Observational astronomy will also be covered.

Prerequisite: None
Fee: None

PHYSICS

2 Semester Course (1/2 credit per semester)

The course studies the physical principle of motion, heat, light, electricity and some nuclear physics. The vocabulary, laws and theories are studied through textbook and laboratory application. The student must have a good understanding of the principles of Algebra II. Some geometry and trigonometry are taught throughout the course. The course aids the student in thinking logically as well as deductively and inductively. Students completing the course successfully should be able to explain and apply the physical laws which govern our environment.

Prerequisite: Algebra II, required 9th & 10th grade Science (C or better in these classes)
Fee: None

FORENSIC SCIENCE

2 Semester Course (1/2 credit per semester)

This course offers students a chance to gain and apply knowledge from the areas of Biology, Chemistry, Earth Science, Archeology, Anthropology, Law, Medicine, and Technical Writing. The course will cover selected topics from the following list: The crime scene, physical evidence, glass and soil, organic analysis, microscopy, hair/fiber/paint/drugs, Toxicology, Forensic Aspects of Arson and Explosions, Forensic Serology, DNA, Fingerprints, Firearms and tool marks, and document and voice examination. The course will evaluate students using a series of inquiry labs, discussion of case studies, field trips and guest speakers, internet research and practical lab exams that will allow students to strengthen skills in observation, interpretation, reasoning, and formal presentations.

Prerequisite: Students will be recommended to take advanced courses based on State assessments and standardized testing scores. Chemistry "B" or better, Algebra I "C" or better
No documented violations of lab safety in any science course
No documented violations of school rules for field trips
Fee: None

FOREIGN LANGUAGE

SPANISH I

2 Semester Course (1/2 credit per semester)

This class is the beginning of Spanish which deals with vocabulary, pronunciation, spelling, verb conjugations, and sentence patterns. This class studies the present tense of both regular and irregular -ar, -er, and -ir verbs. Student will be exposed to cultural components of the language through various types of media. **Students will be expected to use as much spoken Spanish in class as much as possible and will be evaluated on their participation and use of the Spanish language.**

Prerequisite: Passed LA/Eng with a C or better (B for 8th grade going to 9th grade)
Fee: None

SPANISH II

2 Semester Course (1/2 credit per semester)

This class is a continuation of Spanish I which includes a review of all of the above. Students will add on to their knowledge of the present tense and vocabulary and will also learn the preterite tense of verbs. Student will be exposed to cultural components of the language through various types of media. **Students will be expected to use Spanish in class as much as possible and will be evaluated on their participation and use of the language. Most directions and instruction will be given in Spanish.**

Prerequisite: Completion of Spanish I with a C or better (per semester)
Fee: None

SPANISH III

2 Semester Course (1/2 credit per semester)

This class is a continuation of Spanish II which will also include more conversational practice as well as the study of literature, artists, and countries in more depth. The review of all the tenses will be continued as well as the introduction of the subjunctive tense. Student will be exposed to cultural components of the language through various types of media **Students will be expected to use Spanish ONLY in class and will be evaluated on their participation and use of the language. All directions and instruction will be given in Spanish.**

SPANISH IV

2 Semester Course (1/2 credit per semester)

This class is a continuation of Spanish III which will also include more conversational practice as well as the study of literature, artists, and countries in more depth. The review of all the tenses will be continued as well as the further explanation of the subjunctive tense, further exploration of preterit and imperfect and introduction to the and present perfect. Student will be exposed to cultural components of the language through various types of media Students will be expected to use Spanish ONLY in class and will be evaluated on their participation and use of the language. All directions and instruction will be given in Spanish.

TECHNOLOGY

BASIC COMPUTER APPLICATIONS

1 Semester Course (½ Credit)

This course provides an introduction to the Microsoft Office Suite. Students will learn how to use Word, Excel, PowerPoint, and Access. Students will learn how to creates and format flyers, research reports, sales spreadsheets, presentations, and databases using a hands-on approach.

Prerequisite: None
Fee: None

GRAPHIC DESIGN I

1 Semester Course (½ Credit)

This course is an introduction to the use of a digital platform to explore the principles, elements, and theories of design through art and technology. Students will be exposed to a variety of software programs as they create a wide range of design-based projects. Students will learn how to manipulate images, as well as create their own images in Adobe Photoshop. An emphasis on using the tools of Adobe Photoshop is stressed. This class is a prerequisite for Graphic Design II. *This course can be used to meet the fine art requirement for graduation.*

Prerequisite: None
Fee: None

Graphic Design II

1 Semester Course (½ Credit)

In this course, students will continue to develop their computer graphic design skills as well as principles, elements, and theories of design. More advanced work with vector-based art will be added to their learning using Adobe Illustrator. Students will also be introduced to web-based art by using Adobe Photoshop, Adobe Flash, Adobe Premiere Pro and Adobe After Effects. Graphic Design I is a prerequisite for this course. *This course can be used to meet the fine art requirement for graduation.*

Prerequisite: None
Fee: None

Broadcasting

1 Semester Course (½ Credit)

In this course students will concentrate on an emphasis on videography, photography and the mechanics of editing and broadcasting software to create creative videos. Students will organize stories and visualizations associated with those stories for presentation to the student body via TV broadcast.

Examples of assignments include creating public service announcements, on air interviews, how to videos, music videos, and documenting events at our school. Students would be expected to cover extracurricular events, including events outside of class. This is mandatory and will be an integral part of students' grades.

Prerequisite: None
Fee: None

FINE ARTS

VISUAL DESIGN I

1 Semester Course (½ Credit)

Students in this class will learn about the elements of art and principles of design and apply their knowledge to make informed decisions when working with various artistic media (drawing, printmaking, etc.). This class is a prerequisite for Visual Design II.

Prerequisite: None
Fee: \$10.00

VISUAL DESIGN II

1 Semester Course (½ Credit)

Students in this class will learn about various professions in the field of Visual Design. Knowledge about the elements of art and principles of design from Visual Design I will be applied to projects including interior design, city planning, fashion, etc.. This Visual Design I is a prerequisite for this class.

Prerequisite: Visual Design I
Fee: \$10.00

DIGITAL PHOTOGRAPHY I

1 Semester Course (½ Credit)

Students in this class will improve and develop their digital photography skills. They will use digital cameras as a tool to compose well-designed artwork. Students will learn features of the camera and enhance photos. Students may use their own digital camera, however it is not required for this class.

Prerequisite: None
Fee: \$5.00

DIGITAL PHOTOGRAPHY II

1 Semester Course (½ Credit)

Students in this class will continue to improve and develop their digital photography skills. They will use digital cameras as a tool to compose well-designed artwork. Students will learn features of the camera as well as how to manipulate the

images with Adobe Photoshop and other photo editing programs. Students may use their own digital camera, however it is not required for this class.

ART I

2 Semester Course (1/2 credit per semester)

An introduction to the basic areas of studio art, art history, and art appreciation. Included is color theory, design, drawing, and perspective in varied media, calligraphy, pottery, simple crafts, and painting. Special attention is given to the manipulation and care of tools and materials. Art terminology is stressed. Students completing the course successfully should be able to complete original samples of forms noted above and articulate in proper art language when critiquing art pieces completed by themselves and others.

Prerequisite: None
Fee: \$5.00

ART II

2 Semester Course (1/2 credit per semester)

A continuation of the skills stressed in Art I. More freedom is given pertaining to the selection of subject matter and medium used for creative expression and expansion of individual interests. Select art pieces are to be saved for a future art portfolio.

Prerequisite: Art I
Fee: \$10.00

ART III/IV

2 Semester Course (1/2 credit per semester)

Art III/IV is offered to juniors and seniors that have a dedicated interest in art. Portfolio completion and college entrance will be stressed for students wishing to use art as a career choice. Students are required to keep a sketchbook of at least 10 drawings per semester. Focus includes advanced drawing, painting, and art history work. Students must have the instructor's permission to take Art III/IV.

Prerequisite: (Art II to take Art III and IV with instructor's permission) - Grade of 'A' or 'B' in Art II
Fee: (Art III) \$15.00 (Art IV) \$20.00

ART INDEPENDENT STUDY

2 Semester Course (1/2 credit per semester)

This course is offered to art students in their Junior and/or Senior year that desire additional time to work on portfolios for college or wish to further explore mediums of their choice.

Prerequisite: Teacher recommendation - Grade of 'A' or 'B' in previous art class
Fee: \$20.00

CERAMICS

2 Semester Course (1/2 credit per semester)

Students will learn various hand building techniques through the year including pinch, coil, and slab while focusing on the union of form and function. Introduction to traditional and historical ceramic arts will be incorporated into the lab experiences. Students will be introduced to the craft of wheel thrown pottery on a limited basis. Various glaze and decoration techniques for finishing work will be introduced in the beginning class.

Prerequisite: Art I
Fee: \$20

HISTORICAL CINEMA: ART HISTORY

1 Semester Course (1/2 credit)

Explore art history through one of history's most celebrated art forms: cinema. Students will learn about key movements & artists throughout art history (From Vermeer & *The Girl with the Pearl Earring* to Banksy & *Exit Through the Gift Shop*), examine and discuss artistic decisions made in the films, and complete a project related to each film either in artistic content or process.

Prerequisite: None

Fee: \$5

CONTEMPORARY FOLK ART

1 Semester Course (1/2 credit)

In this class students will explore ways in which objects have provided various needs to cultures around the world, both past and present. Emphasis is placed on connections among and between the arts and other subject areas. Objects will include alebrijes, weaving and rug hooking, outsider art, boruca masks, ojo de dios, amate, and more.

Prerequisite: None

Fee: \$10

HIGH SCHOOL CHOIR

2 Semester Course (1/2 credit per semester)

The high school choir is an elective course open to all students grades 9-12 and consisting of both men's and women's voices who audition. Throughout the year, the choir performs a variety of music ranging from serious classics to modern popular music. Choir members are expected to participate at all times in rehearsals, all concerts and all presentations given by the group. Students previously in the choral program will not need to audition again.

Prerequisite:

Audition

Fee:

None

WOMEN'S CHORUS (Gr. 10-12)

2 Semester Course (1/2 credit per semester)

The Clearview Women's Chorus is to consist of 10-12 grade women who have had a year of choir in the past. This is an advanced group where participation is mandatory, and music theory, vocal technique and etiquette are taught. We will have two concerts per year, and a dress code of black and white will be encouraged.

Prerequisite:

Audition & previous participation in a Clearview Choir. Possible uniform purchase.

Fee:

None

HIGH SCHOOL BAND

2 Semester Course (1/2 credit per semester)

The high school band provides many performance opportunities and learning experiences for students. When you elect to schedule band, you are committing yourself to extra time beyond the normal school day and during the summer. Attendance at band camp in late summer is essential for course success. In the fall, the band performs at all varsity football games, band shows and parades. During the remainder of the year, the band studies music and performs in concerts, and contests. As a member of the band, you become eligible to be a member of other performing opportunities that include chamber music, solos, pep band, jazz band, etc. Band students are encouraged to participate for all four years while in high school.

Note: Marching band is a *required* portion of the first semester curriculum. Students may **NOT** opt out of this portion unless they have a serious medical condition; in this instance the student will be asked to assist the director and students with equipment and other “behind the scenes” tasks and will still need to attend all band events on and off campus.

Prerequisite: Prior experience in instrumental ensemble. 1 year of middle/high school band with a passing grade OR several months of successful private lesson instruction.
Fee: None

FAMILY AND CONSUMER SCIENCE

INTRODUCTION TO FAMILY AND CONSUMER SCIENCES

This first course, will provide students with an overview of the four major content areas of Family and Consumer Sciences. Students will be introduced to child development, family relationship concepts and how they relate to family dynamics. Additionally, students will identify financial literacy and consumer economic principles. Students will understand the concepts of design through textiles for personal and home use. Throughout the course, students will develop communication, leadership and career investigation skills.

Prerequisite: None
Fee: \$10.00

TRANSITIONS AND CAREERS

In this course, students will analyze interests, aptitudes and skills to prepare for careers and transition through life. An emphasis will be placed on work ethics, team building, communication and leadership skills. Additional topics will include technology etiquette and career planning. This course shows students how classroom learning translates into marketable skills. Through hands-on learning and local business involvement, students will engage in career-related experiences to acquire basic skills in various career fields. This provides students with tangible experiences to begin career decision making.

Prerequisite: None
Fee: None

PERSONAL FINANCIAL MANAGEMENT

In this course, students will study public policy and consumer behavior related to consumer economics. Throughout the course, students will examine laws and regulations that affect the consumer. Additional topics will include consumer expenditures, consumer fraud, global economy, large purchases, and contracts.

In this course, students will develop personal financial plans for individual personal well-being. Throughout the course, students will develop financial literacy skills to provide a basis for responsible citizenship and career success. Additional topics will include analyzing services from financial institutions, consumer protection, investing and risk management

Prerequisite: Intro to Family and Consumer Science
Fee: \$5.00

CHILD DEVELOPMENT

In this course, students will study the principles of child growth, development and behavior. An emphasis will be place on the cognitive development of a child and sensory and motor skills. Additional topics will include childhood diseases, immunizations, theories of development, learning styles and evaluating childcare services. This course may not be offered every year.

Prerequisite: Intro to Family and Consumer Science
Fee: \$10.00

GLOBAL FOODS

1 semester course (½ Credit)

In this course, students will compare cuisines, ingredients and preferred cooking methods of various cultures. The influence of traditions and regional and cultural perspectives on food choices and culinary practices will be emphasized. Students will examine the issues and conditions that affect the availability and quality of food in the global market, and apply advanced cooking techniques, including the use of specialty and advanced equipment in the preparation of food dishes.

Prerequisite: Intro to Family and Consumer Science
Fee: \$20.00

PRINCIPLES OF FOODS

1 semester course (½ Credit)

In this course, students will gain knowledge in food selection criteria and apply preparation methods to promote a healthy lifestyle. Students will apply cooking methods, ingredient selection and nutritional information in the context of selected food dishes. Throughout the course, basic food safety and sanitation techniques will be emphasized.

Prerequisite: Intro to Family and Consumer Science
Fee: \$20.00

TEXTILE DESIGN AND CONSTRUCTION MAINTENANCE

1 semester course (½ Credit)

In this course, students will study the visual appearance of fabric and fashion design. Students will identify, analyze and apply production processes and techniques to textiles. Additional topics will include the maintenance and alterations of textiles products, including home interior accessories and garments.

In this course students will explore a broad range of topics relating to the various aspects and career opportunities available in the field of textiles and design. The emphasis will be given to textiles project development and developing strategies to maintain the home. Additional topics will include project collaboration, design techniques and environmental sustainability.

Prerequisite: Intro to Family and Consumer Science
Fee: \$20.00

HEALTH AND PHYSICAL EDUCATION

ALL STUDENTS MUST SATISFACTORILY COMPLETE 1/2 CREDIT IN PHYSICAL EDUCATION TO MEET GRADUATION REQUIREMENTS. All physical education courses may be taken more than once but only a total of one P.E. credit will count toward the credits required for graduation. Co-educational activities are incorporated in all classes. Physical education activities will be individually adapted for students with handicaps or injuries.

PHYSICAL EDUCATION

1 Semester Course (1/4 Credit)

This is a required class. This is a general physical education course. Daily participation is required. The students will take part in activities designed for fitness, physical skills and lifetime activity sports. This course will introduce the students to team sports, individual sports and lifetime activity sports. This course is a prerequisite for all other physical education courses.

Prerequisite: None
Fee: None

INTRAMURAL PHYSICAL EDUCATION

1 Semester Course (1/2 Credit)

This is an elective course for juniors and seniors who enjoy competitive team sports. The students will be instructed in the advanced fundamental and strategies of sports. Students are required to participate in a community service project outside of the school day. State mandated assessments are not included in this course. This class does not replace a graduation requirement. Prerequisite: Successful completion of general physical education course

Prerequisite: PE or Approval from a Physical Education Instructor
Fee: None

TEAM SPORTS

1 Semester course (1/2 Credit)

The students will be introduced to a variety of team sports. The course will introduce skills and teamwork. Team building and how teammates work together for a common goal will be stressed. The course will include basketball, volleyball, softball, floor hockey and other team sports. Students will learn the rules for each sport and skills needed to participate in each sport. This is an activity based course. Each student is required to write a report on the history & rules of one sport from the class.

Prerequisite: PE or Approval from a Physical Education Instructor
Fee: None

WEIGHT LIFTING

1 Semester Course (1/2 Credit)

Students of all ability levels (introductory-advanced) can join this class. There will be learning to all different types of beginner exercises and lifting techniques all the way to advanced style lifts and workouts. Course will rely heavily on goal-setting and tracking physical fitness such as weight, strength, endurance over the course of the semester to see results for each individual.

Prerequisite: PE or Approval from a Physical Education Instructor
Fee: None

HEALTH

1 Semester Course (½ Credit)

This is a required class. This course will cover full body wellness leading to healthy life choices and prevention from diseases and other ailments. The students will understand that their decision making skills and personal behaviors are directly related to their own health and those around them. Students will understand those functions. Students will learn the workings of the different systems of the body and how to keep each system healthy. Students will learn the various stages of socialization common to teenagers.

**Per ORC 3313.602, beginning with the 2017-2018 school year, each school district which offers grades nine to twelve shall provide instruction in cardiopulmonary resuscitation and the use of an automated external defibrillator. Instruction shall include the psychomotor skills necessary to perform cardiopulmonary resuscitation and use an automated external defibrillator. "Psychomotor skills" means the use of hands-on practice to support cognitive learning.

Prerequisite: None
Fee: None

NUTRITION/PHYSICAL ACTIVITY (HEALTH/PE HYBRID)

1 Semester Course (½ Credit)

The focus of this class will be to learn how healthy nutrition and physical activity can benefit the body. This will be a hybrid location between the health classroom and also the gym setting. Students will be able to track weight, fat percentage, muscle growth and percentage over the entire semester and be able to create specific goals for their own individual body. In this class we will analyze current trends in health and how nutrition impacts the body. This class will also incorporate physical activities that they can play for a lifetime like weight lifting, aerobic activities, tennis, yoga, frisbee golf, badminton, golf, pickleball, bowling, dance, orienteering. Prerequisite: PE 1 and Health 1

Prerequisite: PE and Health
Fee: None

ADDICTION/SUBSTANCE USE/ABUSE

1 Semester Course (½ Credit)

This class will teach all about addiction and substance use/abuse and how they can harm to the body. The students will examine all the different types of substances that are misused and abused. They will research the effects both long term and short term effects to the brain and body.

Prerequisite: Health
Fee: None

PHYSICAL EDUCATION WAIVER

In order to be eligible for the PE Waiver, students must complete two full seasons of marching band, cheerleading, or high school athletics. Students should pick up the "PE Waiver Form" in the Guidance Office. Students must get all signatures

listed on the "PE Waiver Form" and submit this form to the appropriate guidance counselor when completed. Incomplete forms will not be accepted.

Students must submit the PE Waiver Form **PRIOR** to the senior year. If a student has not completed the 1/2 credit PE requirement or has not turned in the waiver forms by his/her senior year, he/she will be scheduled into PE classes.

Students **DO NOT** get credit for the PE classes that are waived. They simply met the requirements dictated by the State of Ohio for PE. Students are required to take an elective to replace the credit previously earned by PE to ensure that the student earns the 21 credits needed to graduate.

CAREER BASED INTERVENTION

CAREER CONNECTIONS (C.B.I. 10th grade)

2 Semester Course (1/2 credit per semester)

This course is designed for students who should be in the 10th grade who are credit deficient. This class will focus on academic remediation, study skills, credit recovery, self-awareness and career exploration by connecting student's academics to the world of work.

Prerequisite: Selection by staff/ Student will be selected by district career & advising policies.

Fee: None

CAREER BASED INTERVENTION II (C.B.I. 11th grade) 1-4 credits per year

2 Semester Course

(One credit: Classroom Instruction; Two credits: Work Experience; One credit CBI Academic)

The same as C.B.I. for 12th grade except these students should be in the 11th grade but may be credit deficient.

Prerequisite: Permission required due to enrollment requirements

Fee: None

CAREER BASED INTERVENTION II (C.B.I. 12th grade) 1 – 4 credits per year

2 Semester Course

(One credit: Classroom Instruction; Two credits: Work Experience; One credit CBI Academic)

This course is designed for students who should be in the 12th grade but may be credit deficient. The purpose of C.B.I. is to provide meaningful work skills that will help produce employable citizens in the future. The students will take a class in which the curriculum is based on preparing for the world of work, remediation skills in reading and math, self awareness, and career exploration. This class also stresses the importance of good attendance and doing the required assignments for all other academic classes under close supervision of the instructor. Students have the opportunity to recover a limited number of credits by utilizing web-based courses.

In order to reinforce the skills taught in the C.B.I. classroom, students are required to obtain employment. If paid employment cannot be obtained, work-based learning situations approved by the instructor may also be used. If certain criteria are met, the student may be released early from school.

Prerequisite: Permission required due to enrollment requirements

Fee: None

CBI FIELD 11th / 12th Gr

2 Semester Course(1 credit per semester)

CBI Field is designed to serve academic under-achievers and those students who may be at-risk for graduation. These students often have become discouraged with school because of factors that result in a lack of interest and poor attendance. The Career Based Intervention Program attempts to reorient students' attitudes toward high levels of achievement in school and work and reinforce their social responsibility to our society. It is hoped this can be accomplished by arranging suitable, on-the-job training and related instruction to develop feelings of accomplishment and success. Students have the opportunity of earning money and becoming financially responsible while obtaining elective credits. All students must work at employment that conforms to all state and federal wage and hour labor laws, minor labor laws, and must be in compliance with the federal and state minimum wage laws. Students under the age of 18 must obtain work permits. All students will have signed training agreements and training plans as a part of their employment. Students will receive written evaluations based on observations made by the job supervisor. Students must document 120 hours of work experience for each credit earned. Non-paid work experience must also have a training plan and be documented in order to receive credit. Career Based Intervention students, if not credit deficient, may have an early dismissal for work. Otherwise, they are expected to work after school and on weekends. Students are required to maintain employment for the entire school year.

This program is for students who:

- Have a valid driver's license or other transportation**
- Are physically able to work**
- Have been recommended by school personnel**

CBI GOVERNMENT

1 Semester Course (½ Credit)

A course required to qualify for graduation. This course surveys the principles and practices of national, state and local government. Students completing the course successfully should be able to identify key federal, state and local governmental actions and services that affect their life as a citizen of the United States.

----- LORAIN COUNTY JOINT VOCATIONAL SCHOOL

Credit Varies by Program

The Lorain County Joint Vocational School offers a wide variety of pre-employment programs. These programs offer instruction in technical skills in different subject areas. Students who are planning to seek full-time employment upon graduation from high school should consider this program as an educational choice. Special transportation to and from the J.V.S. is provided. This educational option is open only to selected 9th & 10th graders as well as juniors and seniors.

Prerequisite: Application and Acceptance
Fee: Varies by Program

PROJECT LEAD THE WAY

1 Semester Course (½ Credit)

Students are introduced into the basics of engineering, the design process, applying math, science, and engineering standards to hands-on projects. Students design a puzzle cube, model a toy train that runs on a track, and take apart a consumer product and model it using 3-D modeling software. Students that meet the specified requirements can earn college credit for this class.

Prerequisite:

Fee:

College Credit Plus (formerly P.S.E.O Program)

Credit varies

Highly motivated, academically successful high school students may choose to enroll at local colleges and take courses for high school and college credit simultaneously. Students may pursue a wide variety of personal academic interests through this process. Arrangements may be made through the Guidance Department.

Prerequisite:

Intent Form, Application & Accuplacer Test – College ready score

Fees:

None
